

High-quality precision spring manufacturing

ABOUT IRVINE SPRINGS

Based in Irvine, Ayrshire. Irvine Springs was established in 1969 manufacturing bespoke springs for local industry.

Through its reputation and engineering excellence, Irvine Springs has become a leading manufacturer of springs in Scotland with a growing number of customers throughout Europe and the rest of the world.

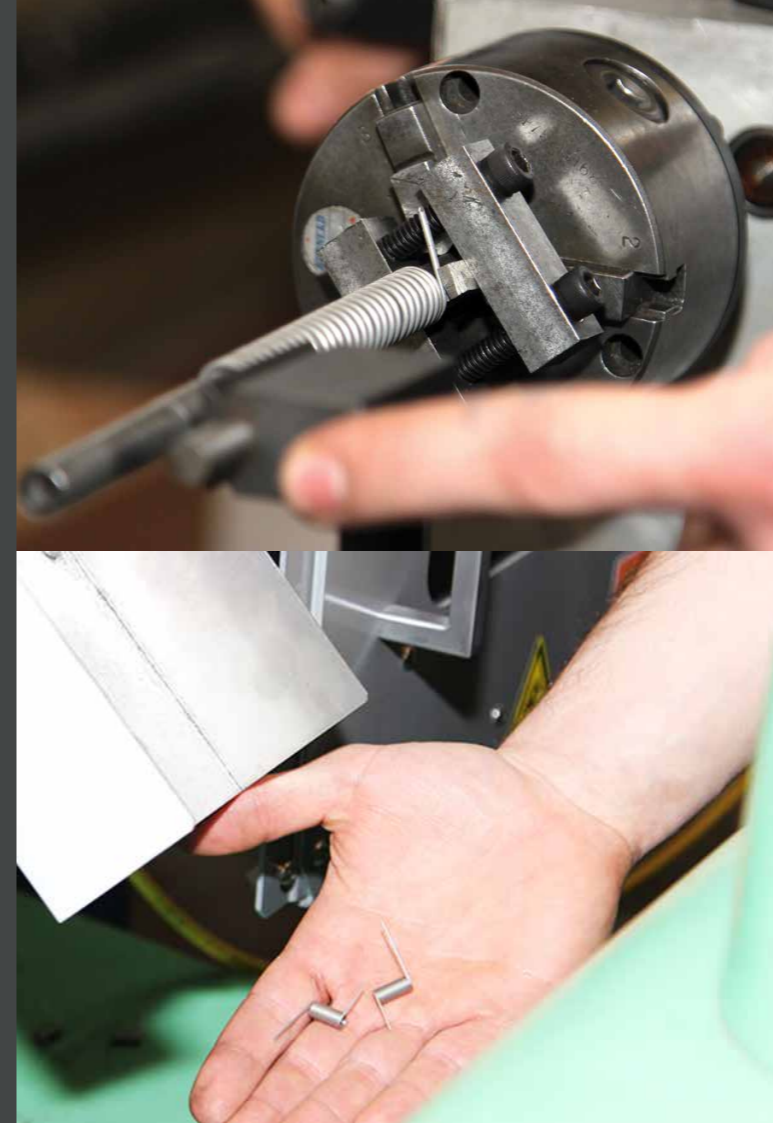

The highly skilled team of spring makers can produce high-quality precision springs which can be manufactured to your requirements in a wide range of base metal materials to exact tolerances.

Irvine Springs offers a bespoke service creating products to your specifications.

We manage the process from initial sketch through design and manufacturing to final testing and delivery.

Protective or decorative finishes and colour dyeing are also available.

- Tension springs
- Compression springs
- Torsion springs
- Wire shapes
- Flat section

SERVICES

The products we offer are compression springs, tension springs, torsion springs, wire shapes, and flat section. These can be manufactured in a wide range of materials with protective and decorative finishes as required.

• Bespoke service

Products to your specifications. We manage the process from initial sketch through design and manufacturing to final testing and delivery

• High-quality precision

All our products can be manufactured to your requirements in a wide range of base metal materials to exact tolerances. Protective or decorative finishes and colour dyeing are also available.

• Delivery

A straight-forward compression or torsion spring could be on its way to you within 24 hours of receipt of your order. Special and complicated shapes take a little longer. We aim to meet your expectations from start to finish including delivery.

• Kanban / Stock

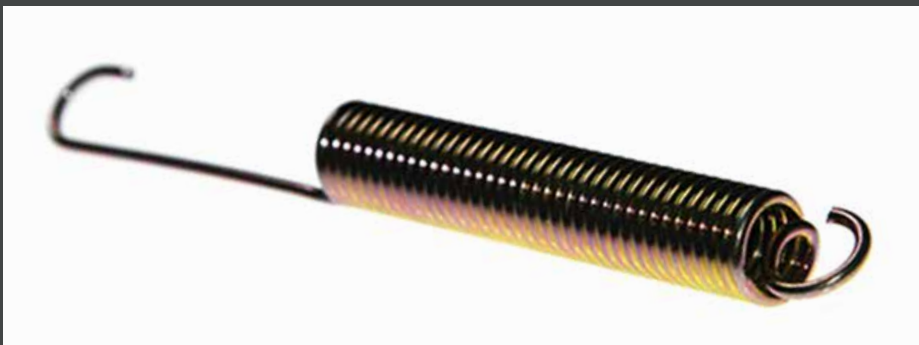

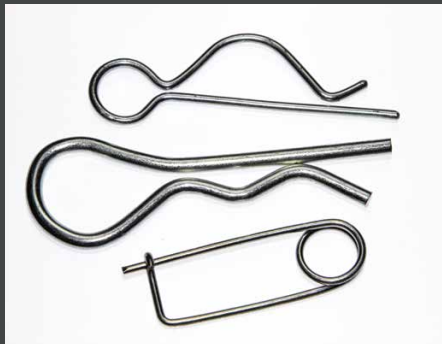

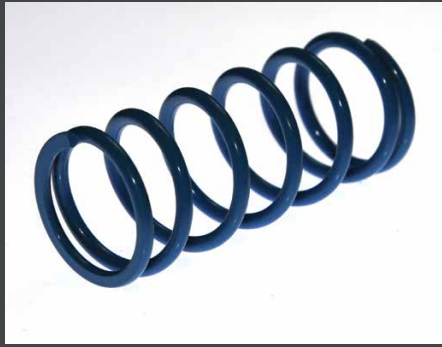

We have the flexibility to maintain stocks of finished product at our premises to pre-agreed levels to enable customers to optimise their stock levels.

• Packaging

Our springs can be packed in an unlimited variety of ways to suit your needs (e.g. to avoid entanglement we can supply on adhesive coated card, in recyclable molded plastic trays, bagged in small quantities or in labeled bags). Whatever your packing needs we would be pleased to discuss them.
